What 102 trading systems had to show for themselves

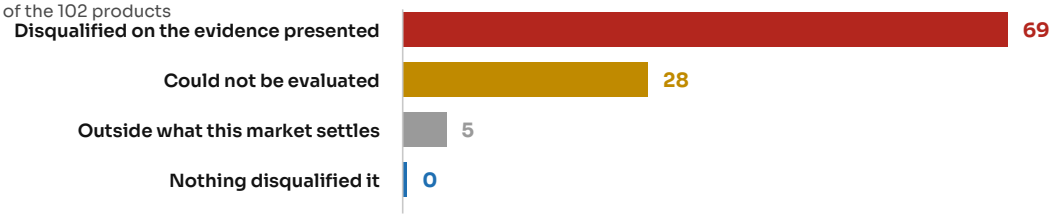

Anonymised findings from independent assessment · 26 October 2026

Every product in this document was bought or downloaded from the MetaTrader 5 marketplace and run on our own machine, against live broker conditions. Each was put through the same checks, in the same order, with the result recorded before the next was started.

Not one of them cleared.

Products assessed	102 (92 paid, 10 free)
Assessment runs	142
Trades examined	334,600
Products that came back clean	0

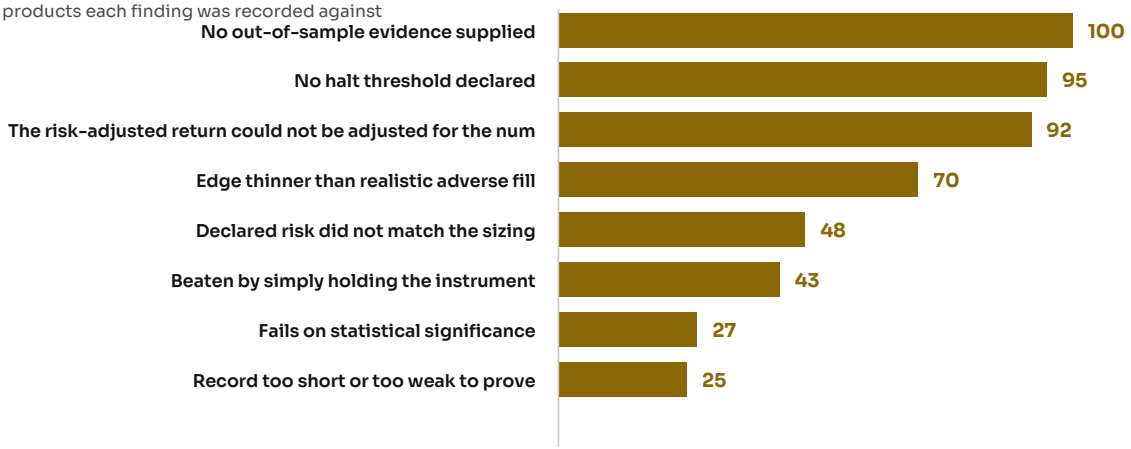

Outcome for each of the 102 products

Why they failed

A product can carry more than one finding. This counts how many separate products each finding was recorded against.

How many products each finding was recorded against

How to read this document

Each entry below is one product. It is identified by a number and nothing else: no product is named, no author is named, no vendor is named. That is deliberate and permanent. This document reports what the evidence showed; it is not a list of accusations and it cannot be used as one.

DISQUALIFIED	At least one finding disqualifies the case as presented. It does NOT mean the product loses money - that was not measured and a backtest cannot show it.
COULD NOT BE EVALUATED	The evidence needed to reach a conclusion was not supplied. This is a result in its own right, not a gap in the work.
OUTSIDE THIS MARKET	The product's behaviour is not something this market's data can settle.
NOTHING DISQUALIFIED IT	The strongest result available anywhere in this system. No product has reached it. There is no pass state, by design.

What this document does not say

It does not say these products lose money	We measured the evidence put forward for each one, not its live result.
It is not a claim about anybody's conduct	Nothing here says any seller misled anyone or withheld anything. We report what the evidence shows and what it cannot show.
It is not a prediction	Nothing here says what any of these products will do next, on any market.
It is not financial advice	And it is not a recommendation to buy, sell, run or stop running anything.

Each finding under an entry is tagged **DISQUALIFYING**, **QUALIFIED** or **NOT EVALUABLE**. A single disqualifying finding is enough to disqualify the case as presented.

The 102 systems

In the order they were assessed.

SYSTEM 001 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	5.45
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 242.46	**Out-of-sample report**	no
Profit factor / trades	1.79 / 666	**Listing**	free
Worst drawdown	10.31 (0.10%)		

DISQUALIFYING Over the same window the system returned +2.4% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 0.482 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 002 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.22
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 40.65	**Out-of-sample report**	no
Profit factor / trades	1.04 / 206	**Listing**	free
Worst drawdown	192.88 (1.91%)		

DISQUALIFYING The record is not long enough, or not strong enough, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned +0.4% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.3584 once the number of configurations declared is taken into account.

DISQUALIFYING Return measured against worst drawdown gives 0.08 units of return per unit of drawdown.

DISQUALIFYING Concentration: the best 5 trades out of 206 account for 296% of all profit.

DISQUALIFYING The whole edge is worth 0.261 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 003 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	-0.26
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / -609.15	**Out-of-sample report**	no
Profit factor / trades	0.96 / 5,257	**Listing**	free
Worst drawdown	759.36 (7.57%)		

DISQUALIFYING Measured risk-adjusted return of -0.26 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.
DISQUALIFYING Over the same window the system returned -6.1% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.
DISQUALIFYING Statistical significance p = 0.6644 once the number of configurations declared is taken into account.
DISQUALIFYING Return measured against worst drawdown gives -0.30 units of return per unit of drawdown.
DISQUALIFYING The system loses money overall (-609.15), so measuring how concentrated its profit is would not mean anything.
DISQUALIFYING The whole edge is worth -0.154 of price per trade. That much adverse fill on an average trade leaves nothing.
DISQUALIFYING Against the spread measured at the time, 0.100 of price, the edge of -0.154 of price covers the cost -1.5 times over.
DISQUALIFYING -1.798% extracted per unit traded: net -609.15 on turnover 33870.87.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 004 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.76
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 3,053.49	**Out-of-sample report**	no
Profit factor / trades	1.15 / 567	**Listing**	free
Worst drawdown	2,637.50 (19.00%)		

DISQUALIFYING Over the same window the system returned +30.5% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.
DISQUALIFYING Statistical significance p = 0.1051 once the number of configurations declared is taken into account.
DISQUALIFYING The whole edge is worth 0.714 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Measured risk-adjusted return of 0.76 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED Concentration: the best 5 trades out of 567 account for 75% of all profit.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 005 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	2.80
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 15,696.38	**Out-of-sample report**	no
Profit factor / trades	1.15 / 21,442	**Listing**	free
Worst drawdown	5,065.67 (30.68%)		

DISQUALIFYING The whole edge is worth 0.437 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 006 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	1.44
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 7,817.80	**Out-of-sample report**	no
Profit factor / trades	1.22 / 791	**Listing**	free
Worst drawdown	2,277.02 (11.85%)		

DISQUALIFYING Over the same window the system returned +78.2% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 1.624 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 007 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	4.66
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 135,142.76	**Out-of-sample report**	no
Profit factor / trades	2.26 / 533	**Listing**	free
Worst drawdown	15,276.71 (15.48%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 008 DISQUALIFIED

Instrument / chart	XAUUSD, 5-minute chart	**Risk-adjusted return**	-
Window	- (- years)	**Configurations declared**	1
Deposit / net result	- / -	**Out-of-sample report**	yes
Profit factor / trades	- / -	**Listing**	free
Worst drawdown	- (-%)		

DISQUALIFYING Over the same window the system returned +48.3% while simply buying and holding the instrument returned +78.5%. Holding the instrument beat it.

SYSTEM 009 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	-1.74
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / -789.78	**Out-of-sample report**	no
Profit factor / trades	0.61 / 238	**Listing**	free
Worst drawdown	826.06 (8.26%)		

DISQUALIFYING Measured risk-adjusted return of -1.74 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned -7.9% while simply buying and holding the instrument returned +88.6%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.9979 once the number of configurations declared is taken into account.

DISQUALIFYING Return measured against worst drawdown gives -0.36 units of return per unit of drawdown.

DISQUALIFYING The system loses money overall (-789.78), so measuring how concentrated its profit is would not mean anything.

DISQUALIFYING The whole edge is worth -4.397 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.100 of price, the edge of -4.397 of price covers the cost -44.0 times over.

DISQUALIFYING -24.044% extracted per unit traded: net -789.78 on turnover 3284.74.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 010 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.11
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 27.54	**Out-of-sample report**	no
Profit factor / trades	1.01 / 180	**Listing**	paid
Worst drawdown	977.08 (8.97%)		

DISQUALIFYING Measured risk-adjusted return of 0.11 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned +0.3% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.4302 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 57.0% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives 0.01 units of return per unit of drawdown.

DISQUALIFYING Concentration: the best 5 trades out of 180 account for 1089% of all profit.

DISQUALIFYING The whole edge is worth 0.202 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED Against the spread measured at the time, 0.100 of price, the edge of 0.202 of price covers the cost 2.0 times over.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 011 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	1.60
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 3,473,477.05	**Out-of-sample report**	no
Profit factor / trades	1.54 / 1,016	**Listing**	paid
Worst drawdown	1,102,894.90 (27.30%)		

DISQUALIFYING The whole edge is worth 0.800 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 012 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	5.33
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 4,417,954.54	**Out-of-sample report**	no
Profit factor / trades	6.68 / 440	**Listing**	paid
Worst drawdown	129,345.60 (3.11%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 013 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	3.95
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 6,071,412.12	**Out-of-sample report**	no
Profit factor / trades	3.08 / 1,232	**Listing**	paid
Worst drawdown	931,550.00 (13.29%)		

DISQUALIFYING Position size ran from 0.97 to 100.00 lots and reached the broker's own ceiling of 100.00. Beyond that point the test measures the broker's limit rather than the strategy.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The whole edge is worth 2.131 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 014 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	5.44
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 38,724,301.09	**Out-of-sample report**	no
Profit factor / trades	2.46 / 684	**Listing**	paid
Worst drawdown	1,504,672.90 (12.46%)		

DISQUALIFYING Position size ran from 0.33 to 100.00 lots and reached the broker's own ceiling of 100.00. Beyond that point the test measures the broker's limit rather than the strategy.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 015 COULD NOT BE EVALUATED

Instrument / chart	BTCUSD, 15-minute chart	**Risk-adjusted return**	16.40
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 6,573.83	**Out-of-sample report**	no
Profit factor / trades	3.35 / 6,624	**Listing**	paid
Worst drawdown	106.48 (0.75%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 016 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	1.24
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 753.35	**Out-of-sample report**	no
Profit factor / trades	1.37 / 604	**Listing**	paid
Worst drawdown	452.03 (4.35%)		

DISQUALIFYING Over the same window the system returned +7.5% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 1.648 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 017 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	7.64
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 936,195.49	**Out-of-sample report**	no
Profit factor / trades	5.00 / 1,592	**Listing**	paid
Worst drawdown	128,223.40 (20.30%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.557 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 018 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	-0.12
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / -2,491.33	**Out-of-sample report**	no
Profit factor / trades	0.95 / 819	**Listing**	paid
Worst drawdown	10,603.63 (60.79%)		

DISQUALIFYING Measured risk-adjusted return of -0.12 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned -24.9% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.5781 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 42.2% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives -0.16 units of return per unit of drawdown.

DISQUALIFYING The system loses money overall (-2491.33), so measuring how concentrated its profit is would not mean anything.

DISQUALIFYING The whole edge is worth -0.130 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.080 of price, the edge of -0.130 of price covers the cost -1.6 times over.

DISQUALIFYING -2.585% extracted per unit traded: net -2491.33 on turnover 96383.43.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 019 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	58.98
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 134,971.89	**Out-of-sample report**	no
Profit factor / trades	59.75 / 1,496	**Listing**	paid
Worst drawdown	746.36 (0.63%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 020 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	6.48
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 4,787.43	**Out-of-sample report**	no
Profit factor / trades	1.13 / 29,628	**Listing**	paid
Worst drawdown	405.06 (2.96%)		

DISQUALIFYING Over the same window the system returned +47.9% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 0.213 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED Against the spread measured at the time, 0.080 of price, the edge of 0.213 of price covers the cost 2.7 times over.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 021 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	2.75
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 465.33	**Out-of-sample report**	no
Profit factor / trades	1.61 / 421	**Listing**	paid
Worst drawdown	54.02 (0.54%)		

DISQUALIFYING Over the same window the system returned +4.7% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 1.459 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 022 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	4.62
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 194,742.17	**Out-of-sample report**	no
Profit factor / trades	3.03 / 1,753	**Listing**	paid
Worst drawdown	16,380.42 (9.43%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 023 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	2.80
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 2,435.46	**Out-of-sample report**	no
Profit factor / trades	1.13 / 6,022	**Listing**	paid
Worst drawdown	367.67 (3.00%)		

DISQUALIFYING Over the same window the system returned +24.4% while simply buying and holding the instrument returned +88.5%. Holding the instrument beat it.

DISQUALIFYING The whole edge is worth 0.534 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 024 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	-
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / -1,839.22	**Out-of-sample report**	no
Profit factor / trades	0.87 / 2,922	**Listing**	free
Worst drawdown	2,107.34 (20.81%)		

No findings were recorded against this product.

SYSTEM 025 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	-6.46
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / -169.65	**Out-of-sample report**	no
Profit factor / trades	0.59 / 1,533	**Listing**	paid
Worst drawdown	170.21 (1.70%)		

DISQUALIFYING Measured risk-adjusted return of -6.46 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned -1.7% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 1.0000 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 0.0% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives -0.36 units of return per unit of drawdown.

DISQUALIFYING The system loses money overall (-169.65), so measuring how concentrated its profit is would not mean anything.

DISQUALIFYING The whole edge is worth -0.148 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.400 of price, the edge of -0.148 of price covers the cost -0.4 times over.

DISQUALIFYING -25.885% extracted per unit traded: net -169.65 on turnover 655.41.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 026 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	11.08
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 3,627.07	**Out-of-sample report**	no
Profit factor / trades	2.27 / 1,861	**Listing**	paid
Worst drawdown	37.82 (0.33%)		

DISQUALIFYING Over the same window the system returned +36.3% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.598 of price per trade. That much adverse fill on an average trade leaves nothing.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 027 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.03
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 14.35	**Out-of-sample report**	no
Profit factor / trades	1.02 / 125	**Listing**	paid
Worst drawdown	260.92 (2.58%)		

DISQUALIFYING Measured risk-adjusted return of 0.03 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned +0.1% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.4773 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 52.3% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives 0.02 units of return per unit of drawdown.

DISQUALIFYING Concentration: the best 5 trades out of 125 account for 2088% of all profit.

DISQUALIFYING The whole edge is worth 0.153 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.400 of price, the edge of 0.153 of price covers the cost 0.4 times over.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 028 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	34.70
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 394,881.35	**Out-of-sample report**	no
Profit factor / trades	7.61 / 42,101	**Listing**	paid
Worst drawdown	34,282.09 (7.86%)		

DISQUALIFYING The whole edge is worth 0.625 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED Against the spread measured at the time, 0.400 of price, the edge of 0.625 of price covers the cost 1.6 times over.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 029 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.98
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 10,662.29	**Out-of-sample report**	no
Profit factor / trades	1.24 / 1,827	**Listing**	paid
Worst drawdown	22,089.96 (51.67%)		

DISQUALIFYING Statistical significance p = 0.0526 once the number of configurations declared is taken into account.
DISQUALIFYING The whole edge is worth 0.353 of price per trade. That much adverse fill on an average trade leaves nothing.
DISQUALIFYING Against the spread measured at the time, 0.400 of price, the edge of 0.353 of price covers the cost 0.9 times over.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED There is a 91.9% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 030 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	7.72
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 2,512,866.05	**Out-of-sample report**	no
Profit factor / trades	123.08 / 536	**Listing**	paid
Worst drawdown	191,670.29 (9.46%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The whole edge is worth 4.482 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 031 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	2.66
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 2,831,477.12	**Out-of-sample report**	no

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 045 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	41.48
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 362,940.74	**Out-of-sample report**	no
Profit factor / trades	8.83 / 32,334	**Listing**	paid
Worst drawdown	2,879.60 (0.78%)		

DISQUALIFYING The whole edge is worth 0.748 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED Against the spread measured at the time, 0.400 of price, the edge of 0.748 of price covers the cost 1.9 times over.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 046 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	5.63
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 4,930,818.24	**Out-of-sample report**	no
Profit factor / trades	9.50 / 909	**Listing**	paid
Worst drawdown	73,925.00 (1.54%)		

DISQUALIFYING Position size ran from 0.50 to 100.00 lots and reached the broker's own ceiling of 100.00. Beyond that point the test measures the broker's limit rather than the strategy.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The whole edge is worth 4.424 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 047 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	17.10
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 6,238.70	**Out-of-sample report**	no
Profit factor / trades	4.99 / 2,804	**Listing**	paid
Worst drawdown	254.91 (2.49%)		

DISQUALIFYING Over the same window the system returned +62.4% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.966 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 048 OUTSIDE THIS MARKET

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.00
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	0.00 / 0.00	**Out-of-sample report**	no
Profit factor / trades	- / 0	**Listing**	paid
Worst drawdown	0.00 (0.00%)		

DISQUALIFYING Measured risk-adjusted return of 0.00 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Statistical significance p = 0.5000 once the number of configurations declared is taken into account.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The buy-and-hold comparison could not be computed over this report's window, so the question of whether holding the instrument would have done better is open.

QUALIFIED Concentration could not be measured: the report carried no per-trade rows to read.

NOT EVALUABLE The probability that the true risk-adjusted return beats zero could not be computed: it needs at least three per-position results that vary between them.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

SYSTEM 049 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	4.88
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1

Profit factor / trades	1.00 / 717	**Listing**	paid
Worst drawdown	863.24 (8.35%)		

DISQUALIFYING Measured risk-adjusted return of -0.03 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned -0.3% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.5203 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 48.0% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives -0.01 units of return per unit of drawdown.

DISQUALIFYING The system loses money overall (-28.60), so measuring how concentrated its profit is would not mean anything.

DISQUALIFYING The whole edge is worth -0.053 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.400 of price, the edge of -0.053 of price covers the cost -0.1 times over.

DISQUALIFYING -0.228% extracted per unit traded: net -28.60 on turnover 12552.84.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 067 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	9.13
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 22,824.81	**Out-of-sample report**	no
Profit factor / trades	3.25 / 3,050	**Listing**	paid
Worst drawdown	963.38 (2.88%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.472 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 068 OUTSIDE THIS MARKET

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.00
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	0.00 / 0.00	**Out-of-sample report**	no
Profit factor / trades	- / 0	**Listing**	paid
Worst drawdown	0.00 (0.00%)		

DISQUALIFYING Measured risk-adjusted return of 0.00 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Statistical significance p = 0.5000 once the number of configurations declared is taken into account.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The buy-and-hold comparison could not be computed over this report's window, so the question of whether holding the instrument would have done better is open.

QUALIFIED Concentration could not be measured: the report carried no per-trade rows to read.

NOT EVALUABLE The probability that the true risk-adjusted return beats zero could not be computed: it needs at least three per-position results that vary between them.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The whole edge is worth 2.266 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 090 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	3.06
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 470.36	**Out-of-sample report**	no
Profit factor / trades	1.52 / 871	**Listing**	paid
Worst drawdown	52.02 (0.50%)		

DISQUALIFYING Over the same window the system returned +4.7% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.
DISQUALIFYING The whole edge is worth 0.719 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED Against the spread measured at the time, 0.400 of price, the edge of 0.719 of price covers the cost 1.8 times over.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 091 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	10.72
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 3,620.53	**Out-of-sample report**	no
Profit factor / trades	3.65 / 2,023	**Listing**	paid
Worst drawdown	58.71 (0.57%)		

DISQUALIFYING Over the same window the system returned +36.2% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.385 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 092 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	7.04
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 923.14	**Out-of-sample report**	no
Profit factor / trades	6.64 / 382	**Listing**	paid
Worst drawdown	18.27 (0.18%)		

DISQUALIFYING Over the same window the system returned +9.2% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 3.221 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 093 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	5.40
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 2,611,163.97	**Out-of-sample report**	no
Profit factor / trades	13.39 / 533	**Listing**	paid
Worst drawdown	186,304.53 (12.24%)		

DISQUALIFYING Position size ran from 0.60 to 100.00 lots and reached the broker's own ceiling of 100.00. Beyond that point the test measures the broker's limit rather than the strategy.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 2.493 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 094 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	6.21
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1

Profit factor / trades	26.20 / 369	**Listing**	paid
Worst drawdown	773,067.80 (5.55%)		

DISQUALIFYING Position size ran from 0.29 to 100.00 lots and reached the broker's own ceiling of 100.00. Beyond that point the test measures the broker's limit rather than the strategy.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 095 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	21.65
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 270,651.97	**Out-of-sample report**	no
Profit factor / trades	27.47 / 7,288	**Listing**	paid
Worst drawdown	9,810.16 (3.49%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 4.486 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 096 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	10.78
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 85,967.50	**Out-of-sample report**	no
Profit factor / trades	5.96 / 1,289	**Listing**	paid
Worst drawdown	8,540.31 (9.67%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 4.819 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 097 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	13.22
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 1,246,580.43	**Out-of-sample report**	no
Profit factor / trades	5.10 / 5,573	**Listing**	paid
Worst drawdown	16,449.02 (1.38%)		

DISQUALIFYING The whole edge is worth 1.232 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 098 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.62
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 144.12	**Out-of-sample report**	no
Profit factor / trades	2.03 / 31	**Listing**	paid
Worst drawdown	104.05 (1.02%)		

DISQUALIFYING Sample size: 31 trades.
DISQUALIFYING Over the same window the system returned +1.4% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.
DISQUALIFYING Statistical significance p = 0.1543 once the number of configurations declared is taken into account.
DISQUALIFYING Concentration: the best 5 trades out of 31 account for 167% of all profit.
QUALIFIED Measured risk-adjusted return of 0.62 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
QUALIFIED There is a 90.3% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 099 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	2.50
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 70,497.72	**Out-of-sample report**	no
Profit factor / trades	2.35 / 1,266	**Listing**	paid
Worst drawdown	25,353.80 (24.42%)		

DISQUALIFYING The whole edge is worth 1.815 of price per trade. That much adverse fill on an average trade leaves nothing.
QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.
NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.
NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 100 COULD NOT BE EVALUATED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	10.27
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 13,999.31	**Out-of-sample report**	no
Profit factor / trades	5.38 / 1,130	**Listing**	paid
Worst drawdown	719.16 (5.88%)		

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The whole edge is worth 4.110 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 101 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	0.11
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 149.38	**Out-of-sample report**	no
Profit factor / trades	1.02 / 301	**Listing**	paid
Worst drawdown	3,258.62 (27.55%)		

DISQUALIFYING Measured risk-adjusted return of 0.11 over 2.75 years of data is too weak, or the record too short, to establish that the result is anything other than chance.

DISQUALIFYING Over the same window the system returned +1.5% while simply buying and holding the instrument returned +88.9%. Holding the instrument beat it.

DISQUALIFYING Statistical significance p = 0.4259 once the number of configurations declared is taken into account.

DISQUALIFYING There is a 57.4% probability that this system's true risk-adjusted return is better than zero, given the length and the shape of its record.

DISQUALIFYING Return measured against worst drawdown gives 0.02 units of return per unit of drawdown.

DISQUALIFYING Concentration: the best 5 trades out of 301 account for 648% of all profit.

DISQUALIFYING The whole edge is worth 0.035 of price per trade. That much adverse fill on an average trade leaves nothing.

DISQUALIFYING Against the spread measured at the time, 0.100 of price, the edge of 0.035 of price covers the cost 0.4 times over.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.

SYSTEM 102 DISQUALIFIED

Instrument / chart	XAUUSD, 15-minute chart	**Risk-adjusted return**	12.18
Window	2024.01.01-2026.10.01 (2.75 years)	**Configurations declared**	1
Deposit / net result	10,000.00 / 930,196.28	**Out-of-sample report**	no
Profit factor / trades	4.73 / 4,937	**Listing**	paid
Worst drawdown	16,434.02 (2.96%)		

DISQUALIFYING The whole edge is worth 1.040 of price per trade. That much adverse fill on an average trade leaves nothing.

QUALIFIED Only one report was supplied, covering one continuous window. Without a second, untouched period tested separately, an overfit cannot be seen by anyone.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

QUALIFIED The declared risk per trade could not be reconciled with the position sizes the report actually shows.

NOT EVALUABLE The risk-adjusted return could not be adjusted for the number of configurations tried, because the spread of results across those configurations was not supplied.

NOT EVALUABLE The product declares no drawdown at which it stops trading, so a stated halt could not be tested against its measured behaviour.
